# Demos

Fine Uploader is the **easiest** javascript file uploader library to set up.

Code examples are provided, whether you are using a jQuery wrapper, or plain JavaScript.

[Basic Setup](#)[Gallery View](#)[Manual Trigger](#)[Validation](#)[Upload to Amazon  
S3](#)

## Basic Setup

Want to upload files to your own server? You need only to include a CSS file, a JavaScript file, and handle the uploads on the server side according to the technology you are using. There are absolutely no other dependencies.

You can quickly set up an HTML page in order to use Fine Uploader:

1. Download and unpack the [latest version of Fine Uploader](#).
2. Use one of the provided server scripts, or write your own.
3. Setup your HTML and JavaScript.
4. Upload!

Have a look at the following live demos for examples of common setups.
